

AQUA APP

Aqua App is a drinking water delivery app template designed for building modern water supply and subscription-based delivery platforms. The template enables users to place on-demand water orders, schedule recurring deliveries, and manage subscriptions through a streamlined mobile experience. It includes essential features for order management, payment handling, delivery scheduling, and subscription tracking. Built with a scalable architecture and optimized code structure, Aqua App delivers smooth performance across Android and iOS platforms, providing a reliable foundation for developing water delivery and supply management applications.
