

BUSTAPP

BustApp is a bus tracking and booking app template designed for building modern public and private transit platforms. The template includes dedicated User and Driver applications to streamline passenger bookings and route management. It supports real-time bus tracking, estimated arrival times, and seamless ticket booking to improve travel efficiency. Built with a scalable architecture and secure, optimized codebase, BustApp ensures reliable performance and smooth user experience. Its clean and customizable interface provides a strong foundation for developing bus service, fleet tracking, and transit management applications.
