

CAB BOOK

Cab Book is a ride-hailing and package delivery app template designed for building modern transportation and logistics platforms. The solution includes dedicated User and Driver modules to manage ride bookings and parcel deliveries efficiently. Users can book local or outstation rides, schedule package deliveries, track trips in real time, make secure payments, and access ride history. Drivers can manage ride requests, delivery assignments, navigation, and service operations through a dedicated interface. Built with a scalable architecture and customizable design, Cab Book provides a reliable foundation for developing taxi booking, mobility, and delivery applications.
