

CABIRA

Cabira is a taxi booking app template designed for building modern ride-hailing and on-demand transportation platforms. The template supports real-time ride requests, GPS-based navigation, promo code integration, and in-app payment processing. It includes dedicated modules for both customers and drivers, enabling efficient ride management and trip coordination. Built with a clean interface and optimized code structure, Cabira ensures smooth performance, scalability, and easy customization. It provides a reliable foundation for developing cab booking, taxi service, and mobility applications tailored to business requirements.
