

## CARKET

CarKet is a complete mobile app template designed for building a modern online car marketplace. It enables users to buy, sell, compare, and review vehicles within a unified platform. The template includes detailed car listings with images, technical specifications, and key features to support informed decision-making. A built-in comparison system allows side-by-side evaluation of multiple vehicles, while the review module enables users to share ownership and usage feedback. Users can also list used cars for sale by uploading images and relevant vehicle details. Built with clean, modular, and scalable code architecture, CarKet ensures smooth performance, easy backend integration, and full customization, making it suitable for launching professional automotive marketplace applications.
