

CARWASH

CarWash is a feature-rich car service booking app template designed for building vehicle maintenance, car detailing, and automotive service platforms. The template includes dedicated User and Service Provider modules that simplify service discovery, appointment scheduling, and service management. Users can browse a wide range of vehicle care services, book appointments, make secure payments, track service progress, and receive real-time notifications. Service providers can efficiently manage bookings, monitor service requests, update availability, and track completed jobs through a centralized interface. Built with a modern user interface, scalable architecture, and performance-optimized codebase, CarWash delivers a seamless user experience while supporting easy customization and backend integration. It serves as a reliable foundation for developing professional car wash, detailing, repair, and vehicle service applications.
