

## CARZILLA

CarZilla is a modern car rental app template designed to streamline vehicle booking and sharing services through a clean and intuitive interface. It enables users to browse available cars, select pickup locations, choose flexible rental dates, and complete bookings with ease. The template includes essential features such as real-time availability, smart location detection, secure payment integration, and structured booking confirmation flows. Built with high-quality, modular, and scalable code architecture, CarZilla ensures reliable performance, easy backend integration, and extensive customization options. It provides a solid foundation for developing production-ready car rental or vehicle-sharing applications with smooth user experience and operational efficiency.
