

CLUB POS

Club POS is a point-of-sale app template designed for restaurants, bars, and clubs to streamline order processing, billing, and inventory management. The solution includes three dedicated modules: Ordering, Kitchen, and Counter Web. The Ordering module enables staff to take and manage customer orders, the Kitchen module helps kitchen staff track and prepare orders efficiently, and the Counter Web module manages billing, payments, and customer interactions at the counter. Built with a scalable architecture and clean, well-structured codebase, Club POS ensures smooth performance during high-order volumes and provides a reliable foundation for developing modern restaurant and hospitality management systems.
