

COURIER APP

Courier App is a logistics and parcel delivery app template designed for building modern courier management platforms. The solution includes dedicated User and Delivery Agent modules to streamline parcel booking, tracking, and delivery operations. Users can schedule pickups and deliveries, track parcels in real time through live map integration, and manage payments using an integrated digital wallet. Delivery agents can optimize routes, update delivery statuses, and manage assigned tasks efficiently. Built with a scalable architecture and customizable design, Courier App provides a reliable foundation for developing courier, logistics, and last-mile delivery applications.
