

DELIDROP

DeliDrop is a courier and parcel delivery app template designed to build structured logistics and delivery management platforms. It enables customers to schedule pickups, track shipments, and manage orders, while delivery agents handle assignments and delivery workflows through a dedicated interface. The template supports multi-category deliveries for different package types, ensuring flexible use across logistics scenarios. It includes real-time delivery tracking for transparency, wallet-based payment integration, promotional and discount management, and multi-language support. Built with a clean, modular, and scalable architecture, DeliDrop provides a reliable foundation for developing efficient, production-ready courier and delivery management applications.
