

DELIQ

DeliQ is a multi-service on-demand delivery app template designed for building comprehensive service and marketplace platforms. The solution includes dedicated User, Vendor, and Driver modules to streamline ordering, fulfillment, and delivery operations. Users can access services such as grocery delivery, food ordering, medicine delivery, courier dispatch, and ride booking through a single application. Vendors can manage products, orders, and customer interactions, while drivers can efficiently handle delivery and transportation tasks. Built with a scalable architecture, customizable design, and optimized code structure, DeliQ provides a reliable foundation for developing modern on-demand service applications.
