

DELIWASH

Deilwash is an on-demand laundry service app template designed to streamline order management, service processing, and delivery coordination within a structured multi-role system. It enables customers to place laundry requests, track order status, and manage payments, while store operators handle service execution and delivery agents manage pickups and drop-offs efficiently. The template includes user, store, and delivery applications, supporting a complete operational workflow. Key features include real-time order tracking, structured service management, ratings and reviews for trust building, payment flow integration, and multi-language support. Built with a clean, modular, and scalable architecture, Deilwash provides a reliable foundation for developing production-ready laundry service platforms.
