

DOCTOHUB

DoctoHub is a comprehensive healthcare app template designed for building doctor appointment booking, telehealth, and medical services platforms. The template enables users to search for doctors by specialty, view detailed profiles, schedule appointments, and manage healthcare activities through a single application. It includes features such as medicine ordering, lab test booking, diagnostic scan scheduling, secure doctor-patient messaging, health blogs, user account management, appointment history, digital test records, and ratings and reviews. Designed with a clean and intuitive user interface, DoctoHub streamlines healthcare access while enhancing patient engagement and convenience. Built on a scalable architecture with a well-structured codebase, it offers reliable performance, easy customization, and seamless backend integration, making it an ideal foundation for developing modern healthcare and medical service applications.
