

DOCTOZONE

Doctozone is a comprehensive healthcare app and website template designed for building end-to-end digital healthcare platforms. The solution includes six dedicated modules—User, Doctor, Seller, Review, Delivery, and Kiosk Apps—covering essential healthcare workflows such as doctor appointment booking, medicine ordering, patient management, healthcare feedback, pharmacy operations, and medical product delivery. Patients can schedule appointments, receive medication reminders, order medicines, and access healthcare services conveniently, while doctors can manage consultations, appointments, and patient interactions. Pharmacies and delivery personnel can efficiently manage product listings and order fulfillment, while the review system supports patient feedback and service ratings. The package also includes a responsive website template for showcasing healthcare services, doctor profiles, appointment booking, and online medicine ordering. Built with a modern user interface, scalable architecture, and well-structured codebase, Doctozone provides a robust foundation for developing healthcare, telemedicine, pharmacy, and hospital management solutions.
