

ELECTRA

Electra is a micro-mobility app template designed for building electric scooter and bicycle rental platforms. The template enables users to locate, unlock, rent, and manage shared electric vehicles through a streamlined mobile experience. It includes essential features such as real-time vehicle tracking, smart lock and unlock workflows, integrated payments, ride history, and user profile management. Built with a modern interface and scalable architecture, Electra supports efficient urban transportation solutions while providing a reliable foundation for developing eBike, eScooter, and shared mobility applications across Android and iOS platforms.
