

## FOODISH

Foodish is a comprehensive multi-restaurant food ordering app template designed for building scalable food delivery and restaurant marketplace platforms. The template includes dedicated User, Restaurant, and Delivery modules that streamline the entire food ordering process from menu discovery to doorstep delivery. Customers can browse restaurants, explore menus, filter options by cuisine, rating, or price, place orders, make secure payments, and track deliveries in real time. Restaurant owners can manage menus, update item availability, process orders, and monitor customer feedback, while delivery personnel can view assigned orders, follow optimized delivery routes, and update delivery statuses. Built with a modern user interface, scalable architecture, and well-structured codebase, Foodish offers smooth performance, easy customization, and seamless integration, making it an ideal foundation for developing feature-rich food delivery applications.
