

FOODPOT

FoodPot is a food delivery app template designed for building modern restaurant ordering and delivery platforms. The template includes essential features such as category-based browsing, detailed food item views with customization options, cart and coupon management, wallet integration, multiple payment methods, and real-time order tracking. It also supports favorites and reorder functionality for an enhanced user experience. Built with a clean and optimized codebase, FoodPot ensures smooth performance, scalability, and easy customization. Its modern interface provides a reliable foundation for developing feature-rich food delivery applications connecting customers with restaurants efficiently.
