

## GOPOOL

GoPool is a ride-sharing and carpooling app template designed for building modern shared mobility platforms. The template enables users to search for available shared rides, while drivers can create and manage ride listings to offer routes. It supports efficient ride matching and streamlined coordination between passengers and drivers through a clean and intuitive interface. Built with a scalable architecture and optimized codebase, GoPool ensures smooth performance, flexibility, and easy customization. It provides a reliable foundation for developing carpooling, ride-sharing, and shared transportation applications.
