

Howsup

Howsup is a complete social media app template designed for building modern content-sharing and community engagement platforms. The template supports multiple content formats, including text posts, images, videos, and map pins, allowing users to share experiences in dynamic and interactive ways. Built with a clean user interface and scalable design structure, Howsup focuses on smooth navigation, content discovery, and user engagement. It provides a strong foundation for developing feature-rich social networking applications with a modern mobile experience.
