

HUNGERZ

Hungerz is a complete restaurant management and food ordering solution designed to streamline restaurant operations across ordering, billing, kitchen management, delivery, and customer engagement. The platform includes eight integrated modules—Counter Web, User, Restaurant, Delivery, Ordering, Kitchen, Kiosk, and Review—creating a unified ecosystem for managing both online and in-store operations. Customers can browse menus, place orders, track deliveries, and share feedback, while restaurant owners can manage menus, orders, payments, and business workflows. Dedicated modules for kitchen operations, table ordering, self-service kiosks, delivery management, and point-of-sale transactions help improve operational efficiency and service quality. Built with a modern user interface, scalable architecture, and well-structured codebase, Hungerz offers seamless backend integration and serves as a robust foundation for developing multi-restaurant ordering, food delivery, and restaurant management platforms.
