

## JESPHER

Jespher is a comprehensive chat app template designed for building modern real-time messaging applications with features similar to popular communication platforms. The template includes private and group messaging, voice and video calling, voice notes, chat history management, and advanced media sharing capabilities. Users can share photos, videos, documents, and audio files, creating a seamless communication experience. It also features user and group profiles, chat customization options, new chat creation, group management, and conversation controls. Built with a clean interface, scalable architecture, and performance-focused design, Jespher provides a strong foundation for developing secure, feature-rich messaging and communication applications.
