

LOAN APP

Loan App is a financial services app template designed for building modern loan comparison and loan management platforms. The template enables users to explore different loan options, compare interest rates, review lender profiles, and make informed borrowing decisions through a streamlined user experience. It includes essential features such as loan category selection, EMI calculation and management, application tracking, and repayment-related workflows. Built with a scalable architecture and optimized code structure, Loan App provides a reliable foundation for developing secure, user-friendly lending and financial service applications.
