

MAKEOVER

Makeover is a professionally designed app template for salon and service appointment booking platforms. It enables customers to discover nearby salons, browse services, and book appointments, while service providers manage bookings, schedules, and offerings through a dedicated interface. Built with a clear user-provider workflow, the template supports multi-salon operations, real-time slot management, and structured appointment handling. It includes provider profiles, ratings and reviews, offers and promotions, wallet-based payment support, and multi-language capability. Developed with a clean, modular, and scalable architecture, Makeover reduces initial development effort and provides a flexible foundation for building salon booking systems or adapting to other appointment-based service platforms.
