

## NFTez

NFTez is an NFT marketplace app template designed for building modern platforms where creators, collectors, and digital asset enthusiasts can discover, manage, and trade NFTs. The template includes essential marketplace features such as NFT exploration, category-based browsing, bidding workflows, wallet management, collection creation, auction and fixed-price listings, user profiles, search functionality, notifications, and multi-language support. Built with a clean interface and scalable architecture, NFTez provides a strong foundation for developing secure, customizable, and feature-rich NFT marketplace applications focused on digital asset management and user engagement.
