

QCABS

Qcabs is a comprehensive taxi booking app template designed for building modern ride-hailing and transportation platforms. The template includes dedicated Passenger and Driver modules that streamline ride booking, trip management, and real-time communication between riders and drivers. Passengers can book rides, track drivers live, manage trips, and make secure in-app payments through an intuitive interface. Drivers can accept ride requests, navigate routes using GPS, manage trip details, monitor earnings, and access ride history to support efficient operations. Built with a modern user interface, scalable architecture, and performance-optimized codebase, Qcabs delivers a seamless user experience while supporting easy customization and backend integration. It provides a reliable foundation for developing feature-rich taxi booking, ride-sharing, and transportation management applications.
