

QVID

Qvid is a feature-rich short video app template designed for building modern social media and content-sharing platforms. The template enables users to create, edit, and share short-form videos while engaging with content through likes, comments, saves, and social sharing features. It includes an interactive video feed for content discovery, music integration, creator profiles, advanced search functionality, in-app messaging, and real-time live streaming capabilities to enhance user engagement. Users can manage their own content, view liked and saved posts, and connect with creators through a seamless social experience. Built with a modern user interface, multi-language support, scalable architecture, and optimized codebase, Qvid delivers smooth performance and easy customization, making it an ideal foundation for developing short video, creator economy, and social networking applications.
