

REPAIRHUB

RepairHub is a modern home services app template designed to help users discover, book, and manage appointments with local service professionals such as plumbers, electricians, handymen, cleaners, and maintenance experts. Built as a dedicated user-facing application, the template focuses on delivering a seamless experience for service discovery, appointment scheduling, and service management. Users can browse service categories, explore professional profiles, schedule bookings, and manage appointments through an intuitive and easy-to-navigate interface. Designed with a clean user interface, scalable architecture, and optimized codebase, RepairHub ensures smooth performance and straightforward customization. It provides a reliable foundation for developing customer-centric home services, repair, maintenance, and local service marketplace applications.
