

SELLYARD

SellYard is a modern classified marketplace app template designed for building platforms where users can buy and sell second-hand, pre-owned, or local products. The template enables sellers to create listings by uploading images, adding product descriptions, and setting prices, while buyers can easily discover items through search and category-based browsing. It includes essential marketplace features such as product listings, advanced search, category filters, user profiles, favorites management, and in-app chat for direct buyer-seller communication. Built with a clean user interface and a modular, scalable architecture, SellYard offers smooth navigation, optimized performance, and easy customization, making it an ideal foundation for developing peer-to-peer marketplace and classified advertising applications.
