

SHOPPERZ

Shopperz is a comprehensive and scalable eCommerce app template designed for building modern online retail platforms across categories such as fashion, beauty, electronics, and general merchandise. It features a well-structured, multi-module architecture consisting of Customer, Seller, and Delivery applications, enabling a complete marketplace ecosystem. The Customer app supports product discovery, search, cart management, wishlist, and order tracking for a seamless shopping experience. The Seller module provides tools for product listing management, order processing, sales tracking, and inventory control, while the Delivery module enables efficient assignment handling, status updates, and delivery tracking. Built with clean, modular, and performance-optimized code, Shopperz ensures fast integration, smooth scalability, and a modern user interface suitable for production-grade eCommerce solutions.
