

SUZLON POS

Suzlon POS is a comprehensive restaurant management app template designed to streamline operations for food businesses of all sizes. The template includes essential features such as a point-of-sale system, order management, inventory tracking, and a kitchen display interface. It is structured into three core modules: Ordering, Kitchen, and Web. The Ordering module enables staff to efficiently take and manage customer orders, the Kitchen module provides real-time order tracking for preparation workflows, and the Web module handles billing, payments, and overall restaurant administration. Built with a clean and scalable architecture, Suzlon POS offers reliable performance, easy customization, and strong support for high-volume restaurant operations.
