

TRIPUP

TripUp is a ready-to-use travel booking app template designed for building comprehensive travel and reservation platforms. It supports multiple booking services, including flights, trains, buses, hotels, homestays, and curated holiday packages within a unified system. Built with clean, modular, and well-structured code, TripUp ensures high performance, maintainability, and easy integration with backend services. The template provides a streamlined booking flow with essential screens for search, selection, reservation, and confirmation. Its modern and user-friendly interface enhances usability, while its scalable architecture allows extensive customization, making it suitable for developing full-scale travel booking applications or extending existing travel-focused products.
