

WEDPLAN

WedPlan is a comprehensive wedding planning app template designed for building modern event planning and vendor marketplace platforms. The solution includes dedicated User and Vendor modules to streamline wedding planning, vendor discovery, and booking management. Users can browse service categories, explore vendor profiles, communicate through in-app messaging, manage planning checklists, and track shortlisted vendors. Vendors can manage service listings, availability, bookings, client communications, and performance insights from a centralized interface. Built with a scalable architecture and customizable design, WedPlan provides a reliable foundation for developing professional wedding and event management applications.
