

WOOCHAT

WooChat is a comprehensive chat app template designed for building modern communication and social messaging platforms. The template includes essential features such as private and group messaging, real-time voice and video calling, media sharing, push notifications, and conversation management. Users can exchange text messages, images, videos, audio files, and documents while tracking message delivery and read statuses for seamless communication. The platform also supports user profile management, status updates, chat history access, and media organization, creating a complete messaging experience. Built with a modern user interface, scalable architecture, and performance-optimized codebase, WooChat delivers smooth functionality across devices and offers easy customization, making it an ideal foundation for developing feature-rich messaging, communication, and social networking applications.
