

CabBook App Features

CabBook is an advanced ride-booking and package delivery platform that helps users book rides and send parcels with ease. It provides real-time ride tracking, secure digital payments, driver management, and multilingual accessibility for modern transportation services.

Tech

Android & iOS development - Flutter

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App allows customers to book rides, schedule deliveries, and track trips through a simple and user-friendly interface.

Features

1. **Booking Type Selection** – Users can choose ride booking or package delivery services based on their transportation requirements easily.
 2. **Ride Selection** – Browse available ride options with vehicle details, pricing, driver information, and estimated arrival times online.
 3. **Scheduled/Package Delivery** – Users can schedule future rides and arrange secure package deliveries directly from the application platform.
 4. **Booking Activity Tab** – Manage active, completed, canceled, and upcoming rides through organized booking activity sections within the application.
 5. **Chat with Driver** – Real-time messaging allows passengers and drivers to communicate regarding routes, pickup points, and ride updates.
 6. **Add Rating** – Customers can rate drivers and share ride experiences to maintain service quality and customer satisfaction standards.
 7. **eWallet Integration for Payment** – Secure wallet systems support digital payments, cashback rewards, and seamless ride transactions online securely.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global transportation communities worldwide.
-

Driver App

The Driver App helps drivers manage rides, earnings, passenger requests, and transportation operations through a centralized system.

Features

1. **Online/Offline Status** – Drivers can manage availability status and receive ride requests based on their active working schedules online.
2. **Ride Request** – Receive real-time passenger ride requests with options to accept or reject bookings instantly through the application.
3. **Ride Detail** – Detailed trip sections display passenger information, pickup locations, routes, fares, and booking requirements clearly online.
4. **Chat with User** – Instant messaging improves communication between drivers and passengers regarding ride schedules and trip updates online.
5. **Detailed Insight** – Analytics dashboards provide insights into ride performance, completed trips, ratings, and earnings statistics clearly online.
6. **Dark/Light Mode** – Flexible application themes improve visibility and usability during both daytime and nighttime driving operations smoothly.
7. **eWallet Integration** – Drivers can manage wallet balances, ride earnings, digital payments, and transaction records securely through the application.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility among global driver communities worldwide.

Admin Panel

The Admin Panel provides centralized control over rides, drivers, payments, analytics, and transportation platform management operations.

Features

1. **Live Ride Status in Map View** – Admins can monitor active rides and driver locations through interactive live tracking maps online.
2. **Ride Analytics with Graph** – Visual analytics provide insights into bookings, completed rides, revenue growth, and operational performance trends.
3. **New Registration Analytics** – Track new passenger and driver registrations through advanced reporting dashboards and analytical systems online.
4. **Transaction Analytics** – Monitor ride payments, wallet activities, commissions, refunds, and transaction records through detailed financial reporting.
5. **Add/Edit Coupon and Banners** – Manage promotional banners, ride discounts, cashback rewards, and marketing campaigns from one dashboard.

6. **Add/Edit Vehicle** – Admins can create, update, and manage vehicle categories and transportation service options within the platform.
7. **Dark/Light Theme** – Flexible dashboard themes improve administrator visibility and usability during long operational management sessions online.
8. **Other Important Settings of App** – Configure notifications, permissions, payment methods, and complete transportation platform settings efficiently.
