

DoctoWorld App Features

DoctoWorld is a complete healthcare platform that connects patients, doctors, pharmacies, and delivery partners digitally. It simplifies doctor consultations, medicine ordering, hospital discovery, and healthcare management through secure and user-friendly applications.

Tech

Android & iOS development - Ionic

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App helps users find doctors, order medicines, book appointments, and manage healthcare services from one platform.

Features

1. **Multi-Vendor Ordering** – Users can order medicines online from multiple pharmacies through one centralized healthcare application easily.
2. **Product Detail** – Detailed medicine pages display pricing, dosage information, usage instructions, and product availability clearly for users.
3. **Upload Prescription** – Users can securely upload prescriptions for medicine verification and smooth pharmacy order processing online instantly.
4. **Find Doctor** – Search nearby specialists and healthcare professionals based on category, experience, ratings, and availability preferences online.
5. **Doctors Map View** – Interactive maps help users locate nearby doctors, clinics, and healthcare facilities with accurate location information.
6. **Doctor Detail** – Detailed doctor profiles display specialization, experience, consultation fees, reviews, and appointment availability for patients online.
7. **Book Appointments** – Users can schedule doctor appointments based on preferred dates, consultation timings, and healthcare service availability easily.
8. **My Appointment** – Manage upcoming, completed, and canceled doctor appointments through organized healthcare booking management sections online.
9. **Video Consultation & Chat** – Secure video consultations and instant messaging improve communication between patients and healthcare professionals online.

10. **Find Hospital** – Search nearby hospitals and healthcare centers based on services, specialties, and patient requirements quickly online.
 11. **Hospital Detail** – Detailed hospital profiles display facilities, departments, doctors, reviews, and contact information for patients online clearly.
 12. **eWallet Integration for Payments** – Secure wallet systems support online healthcare payments, consultations, and medicine transactions safely online.
 13. **Add/Edit Pill Reminder** – Users can create medicine reminders and manage healthcare schedules for improved medication tracking consistently online.
 14. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global healthcare communities worldwide.
-

Doctor App

The Doctor App helps healthcare professionals manage appointments, consultations, patient communication, and medical service availability efficiently.

Features

1. **Accept/Reject Appointment** – Doctors can manage appointment requests by accepting or rejecting bookings directly through the healthcare application.
 2. **Appointment Detail** – Detailed appointment sections display patient information, consultation timings, and healthcare service requirements clearly online.
 3. **Video and Chat Consultation** – Doctors can provide secure online consultations through video calls and real-time patient messaging systems.
 4. **Rating and Reviews** – Doctors can monitor patient ratings and reviews to improve healthcare service quality and trust online.
 5. **Doctor Profile** – Healthcare professionals can manage profiles, qualifications, experience, and consultation details through centralized dashboards online.
 6. **Add Availability** – Doctors can manage consultation schedules, available timings, and appointment slots directly from the application easily.
 7. **Select Services** – Doctors can configure healthcare services, consultation categories, and medical specialties within their professional profiles online.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility among global healthcare professionals worldwide.
-

Seller App

The Seller App helps pharmacies manage medicine orders, deliveries, products, and customer communication from one platform efficiently.

Features

1. **New/Past Order View** – Pharmacies can manage active and completed medicine orders through organized operational dashboards online efficiently.
2. **Order Detail** – Detailed order sections display customer information, prescriptions, ordered medicines, and delivery instructions clearly online.
3. **Live Order Tracking** – Sellers can monitor medicine preparation, dispatch updates, and delivery progress in real time online easily.
4. **Real-Time Chat** – Instant messaging improves communication between pharmacies, customers, and delivery partners regarding medicine orders online.
5. **Add/Edit Products** – Pharmacies can create, update, and manage medicine listings, pricing, and inventory availability efficiently online.
6. **Detailed Insight** – Analytics dashboards provide insights into pharmacy sales, medicine orders, earnings, and operational performance clearly online.
7. **Earning** – Sellers can monitor pharmacy earnings, completed transactions, and financial activities through centralized wallet management systems.
8. **eWallet & Send to Bank** – Secure wallet integration allows sellers to manage earnings and transfer balances directly to banks.
9. **Rating and Review** – Pharmacies can monitor customer feedback and ratings to improve healthcare service experiences consistently online.
10. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility among global pharmacy communities worldwide.

Delivery App

The Delivery App helps delivery partners manage healthcare deliveries, navigation, earnings, and communication through one platform.

Features

1. **Mark Online/Offline Status** – Delivery partners can manage working availability and receive medicine delivery requests instantly through the application.
2. **Delivery Request** – Receive real-time medicine delivery requests with pickup details and customer delivery instructions clearly online instantly.
3. **Navigation to Customer/Seller** – Integrated navigation provides optimized routes for accurate pharmacy pickups and faster medicine deliveries efficiently online.

4. **Real-Time Chat with Customer/Seller** – Instant messaging allows smooth communication regarding delivery updates, routes, and medicine order activities online.
5. **View Order Details** – Detailed sections display customer information, delivery addresses, medicines, and prescription-related delivery requirements clearly online.
6. **eWallet Integration** – Delivery partners can manage wallet balances, earnings, and secure healthcare payment transactions directly online securely.
7. **Check Performance in Insight** – Analytics dashboards provide delivery insights, completed orders, ratings, and earnings performance statistics clearly online.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility among global delivery partner communities worldwide.

Admin Panel

The Admin Panel provides centralized control over users, doctors, pharmacies, deliveries, payments, and healthcare platform operations efficiently.

Features

1. **Live Order Status in Map View** – Admins can monitor medicine deliveries and healthcare activities through interactive live tracking maps online.
2. **Order Analytics with Graphs** – Visual analytics provide insights into healthcare orders, consultations, revenue growth, and operational statistics clearly online.
3. **New Registration Analytics** – Track new patient, doctor, pharmacy, and delivery partner registrations through detailed analytical dashboards online.
4. **Transaction Analytics** – Monitor healthcare payments, wallet activities, commissions, refunds, and transaction histories through financial reporting systems.
5. **Payment Method Management** – Configure payment gateways, wallet systems, banking integrations, and secure healthcare payment processing settings centrally.
6. **Other Settings of App** – Manage notifications, permissions, operational preferences, and platform configurations through centralized administration dashboards online.
7. **Dark/Light Theme** – Flexible dashboard themes improve administrator visibility and usability during long healthcare management operations online efficiently.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global healthcare administrative communities worldwide.
