

GoPool App Features

GoPool is a smart carpooling platform that helps users share rides, reduce travel costs, and connect with nearby commuters easily. It offers ride-sharing management, real-time communication, wallet integration, and multilingual accessibility for modern shared transportation solutions.

Tech

Android & iOS development - Flutter

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App helps commuters find shared rides, offer pools, and manage trips conveniently anytime through an intuitive interface.

Features

1. **Find Pool** – Users can search nearby shared rides based on routes, destinations, schedules, and travel preferences conveniently anytime efficiently.
2. **Providers List** – View available pool providers with trip details, ratings, pricing, and vehicle information conveniently anytime through organized listings.
3. **Pooler Info** – Detailed rider and driver profiles display travel information, reviews, and preferences conveniently anytime efficiently through dashboards.
4. **Offer Pool** – Users can create and share rides with available seats for nearby commuters conveniently anytime efficiently online.
5. **My Trips** – Manage upcoming, active, and completed shared rides conveniently anytime through organized trip management dashboards efficiently online.
6. **Real-Time Chat** – Instant messaging enables smooth communication between riders and drivers regarding routes and schedules anytime conveniently efficiently.
7. **Wallet Integration** – Secure wallet systems support ride payments, balance management, and seamless digital transactions conveniently anytime efficiently online.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility across global commuting communities worldwide efficiently.

Admin Panel

The Admin Panel provides centralized control over rides, users, analytics, payments, and carpooling platform management efficiently anytime.

Features

1. **Live Tracking in Map View** – Admins can monitor active shared rides and commuter locations through interactive live tracking maps efficiently anytime.
2. **Booking Analytics with Graphs** – Visual analytics provide insights into ride bookings, usage trends, and platform performance conveniently anytime efficiently.
3. **New Registration Analytics** – Track new rider and driver registrations using advanced analytical reporting systems efficiently anytime conveniently online.
4. **Transaction Analytics** – Monitor wallet payments, ride transactions, earnings, and financial activities conveniently anytime efficiently through detailed reports.
5. **Payment Method Management** – Configure and manage digital payment methods, wallet systems, and transaction preferences conveniently anytime efficiently online.
6. **Other Settings of App** – Configure notifications, permissions, operational controls, and complete carpooling platform settings conveniently anytime efficiently.
7. **Dark/Light Theme** – Flexible dashboard themes improve administrator visibility, usability, and comfort during long operational management sessions effectively.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility across global transportation communities worldwide efficiently.
