

Handyman App Features

Handyman is an on-demand home service platform that helps customers book trusted professionals for household services quickly and easily. It offers seamless booking experiences, provider management, real-time communication, and multilingual accessibility for modern home service solutions.

Tech

Android & iOS development - Ionic

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App allows customers to discover home services, connect with professionals, and manage bookings from a single platform.

Features

1. **Search Service by Categories** – Users can browse services including cleaning, plumbing, painting, repairs, salon, and maintenance solutions easily.
 2. **Service Provider List** – View nearby professionals with ratings, expertise, pricing, and availability through organized provider listings online.
 3. **Provider Detail** – Detailed provider profiles display experience, services offered, reviews, and important business information for customers.
 4. **Request List View** – Users can manage upcoming, ongoing, and completed service requests through organized booking management sections.
 5. **Booking Status** – Real-time booking updates help customers track appointment progress and completed service activities from the application.
 6. **Add Rating and Review** – Customers can share reviews and ratings based on their service experiences with professional providers online.
 7. **Real-Time Chat with Provider** – Instant messaging allows direct communication between customers and service providers regarding appointments and requests.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global customer communities worldwide.
-

Provider App

The Provider App helps professionals manage bookings, customer communication, and service operations through a centralized platform.

Features

1. **Upcoming/Completed Request** – Providers can manage active and completed service requests through organized operational booking dashboards easily.
 2. **Booking Detail** – Detailed booking sections display customer information, schedules, requested services, and appointment requirements clearly online.
 3. **Booking Status** – Providers can update booking progress and service completion statuses for real-time customer notifications and updates.
 4. **Create Provider Profile** – Professionals can build detailed profiles showcasing expertise, skills, certifications, and business information online.
 5. **Upload Portfolio** – Providers can upload project samples and completed work portfolios to attract more potential customers easily.
 6. **Plan Purchase** – Subscription plans provide access to premium features and advanced business opportunities within the service platform.
 7. **Real-Time Chat with Customer** – Instant messaging improves communication between providers and customers regarding services and booking updates.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility among service provider communities globally.
-

Admin Panel

The Admin Panel provides centralized control over bookings, services, providers, payments, and home-service platform operations.

Features

1. **Appointment Analytics** – Interactive analytics provide insights into bookings, appointments, revenue growth, and overall platform performance trends.
2. **User's Usage Statistics** – Monitor customer engagement, service activities, and application performance through detailed analytical reporting systems.
3. **Manage Services** – Admins can create, update, organize, and monitor all home-service categories and operational activities efficiently.
4. **Booking Management** – Manage appointments, schedules, customer requests, and service workflows from a centralized administration dashboard easily.
