

MusicVic App Features

MusicVic is a modern music streaming platform that combines powerful audio experiences with smart music discovery features. It allows users to stream songs, explore artists, create collections, and enjoy multilingual music entertainment from one platform.

Tech

Android & iOS development - Flutter

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App helps music lovers stream songs, discover artists, and manage playlists through an immersive listening experience.

Features

1. **Choose Artists & Language** – Users can personalize music preferences by selecting favorite artists and preferred listening languages easily.
 2. **Listen Music** – Stream high-quality music tracks across multiple genres with smooth playback and uninterrupted listening experiences online.
 3. **Search Songs by Genre** – Smart search functionality helps users discover songs, albums, and artists by music genres instantly online.
 4. **Radio** – Listen to curated radio stations and trending music playlists based on listening interests and favorite artists.
 5. **Collection** – Users can organize favorite songs, playlists, albums, and saved music collections within personalized library sections.
 6. **App Settings** – Customize notification preferences, playback settings, themes, and account configurations directly from the application dashboard.
 7. **Paid Subscription** – Premium subscriptions unlock ad-free streaming, exclusive content, and enhanced music listening experiences for users.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for improved accessibility across global music communities worldwide.
-

Admin Panel

The Admin Panel provides centralized control over artists, subscriptions, media content, analytics, and music platform operations efficiently.

Features

1. **New Registration Analytics** – Track new user registrations and platform growth through detailed analytical reporting dashboards online efficiently.
2. **Categories/Media Management** – Manage music categories, albums, playlists, audio tracks, and media content from centralized dashboards easily.
3. **Add/Edit Artist** – Admins can create, update, and manage artist profiles, music information, and related media content online.
4. **Banner Management** – Control promotional banners, featured playlists, campaigns, and marketing content across the music streaming platform.
5. **Manage Subscription** – Configure premium subscription plans, pricing, user access, and recurring payment settings from one dashboard.
6. **Other Settings of App** – Manage permissions, notifications, platform preferences, and additional application operational settings centrally online.
7. **Dark/Light Theme** – Flexible dashboard themes improve administrator visibility and usability during long platform management sessions online.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global administrative communities worldwide.
