

QCabs App Features

QCabs is a ride-hailing platform designed to connect passengers with nearby drivers and multiple vehicle options for convenient travel. It enables ride booking, trip tracking, secure payments, driver management, and real-time communication between users and drivers.

Tech

Android & iOS development - Ionic

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App allows passengers to book rides, select vehicle types, and manage trips with real-time tracking and payments.

Features

1. **Pick/Drop Location Selection** – Users can set pickup and destination locations on the map for accurate ride booking and navigation.
 2. **Ride Type Selection** – Choose from multiple ride categories such as economy, premium, or shared rides based on travel needs.
 3. **Ride Detail** – View complete ride information including driver profile, vehicle details, fare estimate, and trip summary.
 4. **Add Rating and Review** – Passengers can rate drivers and share feedback after trip completion to improve service quality.
 5. **My Trips** – Access trip history including completed, upcoming, and cancelled rides in an organized dashboard.
 6. **eWallet Integration for Payment** – Secure wallet system enables cashless payments, fare management, and transaction history tracking.
 7. **Refer and Earn** – Users can invite friends and earn rewards, cashback, or discounts for successful referrals.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for global user accessibility and better experience.
-

Driver App

The Driver App helps drivers manage ride requests, earnings, trips, and customer interactions in real time.

Features

1. **Online/Offline Status** – Drivers can toggle availability to receive ride requests based on working preferences.
2. **Ride Request** – Real-time incoming ride requests with options to accept or reject trips instantly.
3. **Ride Detail** – Displays passenger details, pickup/drop location, fare information, and trip navigation data.
4. **Detailed Insight** – Analytics showing earnings, completed rides, performance, and activity summaries clearly.
5. **Ride List** – Manage ongoing, completed, and scheduled rides in an organized trip management section.
6. **eWallet Integration** – Drivers can manage earnings, wallet balance, and transaction history securely.
7. **Rating and Review** – Drivers can view passenger feedback and improve service quality based on ratings.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility worldwide.

Admin Panel

The Admin Panel provides centralized control over rides, users, drivers, payments, and platform operations.

Features

1. **Booking Management** – Manage all ride bookings, assignments, cancellations, and trip statuses from one dashboard.
2. **Earning Analytics** – View revenue reports, driver payouts, commissions, and financial performance insights.
3. **User's Usage Statistics** – Track passenger activity, ride frequency, and platform engagement analytics.
4. **Review & Rating Management** – Monitor and manage driver and passenger ratings to maintain service quality.
