

ShareWorld App Features

ShareWorld is a social networking platform where users can share content, connect with followers, and express themselves using text, photos, and videos. It provides seamless social interactions, media sharing, communication tools, and multilingual accessibility for engaging online communities.

Tech

Android & iOS development - Flutter

Backend Development - Laravel

Admin Panel Development - Angular

User App

The User App allows people to share posts, interact with followers, and explore social content through an interactive platform.

Features

1. **News Feed** – Users can explore personalized feeds with trending posts, updates, photos, videos, and social activities online.
 2. **Short Video** – Watch and upload engaging short-form videos to increase audience interaction and social media engagement easily.
 3. **Upload Photos and Videos** – Users can share media content, personal moments, and creative posts directly from their devices online.
 4. **Chat with Followers** – Real-time messaging allows users to communicate privately with followers and build stronger social connections online.
 5. **Comment/Like Posts** – Users can interact with posts through likes, comments, and reactions to improve social engagement consistently.
 6. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility across global social communities worldwide.
-

Admin Panel

The Admin Panel provides centralized control over users, posts, content moderation, analytics, and social platform management operations.
