

Vroom App Features

Vroom is a smart ride-booking platform that connects passengers with nearby drivers for safe, affordable, and reliable transportation services. It provides real-time ride management, secure payments, communication tools, and multilingual accessibility for modern travel experiences.

Tech

Android & iOS development - Ionic
Backend Development - Laravel
Admin Panel Development - Angular

Passenger App

The Passenger App allows users to book rides, connect with drivers, and manage trips through an easy-to-use interface.

Features

1. **Pick/Drop Location Selection** – Users can select pickup and destination locations with accurate route mapping and location-based ride suggestions.
 2. **Riders List** – Browse available drivers with vehicle details, estimated fares, ratings, and nearby ride availability in real time.
 3. **Rider Profile and Review** – Detailed driver profiles display reviews, trip history, ratings, and vehicle information before booking rides.
 4. **Real-Time Chat with Rider** – Instant messaging allows passengers and drivers to communicate regarding pickup points and trip updates easily.
 5. **eWallet Integration** – Secure wallet integration supports digital payments, balance management, and cashless ride transactions within the application.
 6. **Add Rating and Review** – Passengers can share feedback and provide ratings based on their overall ride and driver experience.
 7. **Refer and Earn** – Referral programs reward users for inviting friends and increasing engagement on the ride-booking platform.
 8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for a better user experience across different regions globally.
-

Driver App

The Driver App helps drivers manage rides, earnings, passenger requests, and trip communication with complete operational control.

Features

1. **Add/Edit Ride** – Drivers can create, update, and manage ride availability, routes, pricing, and travel schedules easily.
2. **Ride Request** – Receive real-time ride requests with options to accept or reject bookings based on availability preferences.
3. **Ride Detail** – Detailed trip pages display passenger information, pickup locations, routes, fares, and booking requirements clearly.
4. **Fare Confirmation & Review** – Drivers can review ride fares, confirm trip completion, and monitor earnings from completed bookings.
5. **Real-Time Chat with Passenger** – Instant messaging improves communication between drivers and passengers during ride scheduling and active trips.
6. **eWallet Integration** – Wallet systems help drivers manage ride earnings, transactions, and digital payment settlements securely online.
7. **Refer and Earn** – Referral features encourage drivers to invite new users and earn rewards through successful registrations.
8. **Multi-Lingual Including RTL** – Supports multiple languages and RTL layouts for better accessibility among global driver communities.

Admin Panel

The Admin Panel provides centralized control over rides, drivers, payments, analytics, and transportation platform operations.

Features

1. **Booking Management** – Admins can manage ride bookings, cancellations, trip schedules, and transportation activities from a single dashboard.
2. **Earning Analytics** – Interactive analytics provide insights into driver earnings, booking revenue, and platform growth performance trends.
3. **User's Usage Statistics** – Monitor passenger engagement, booking activities, and application usage through detailed analytical reporting systems.
4. **Review & Rating Management** – Manage customer feedback, driver reviews, and overall service ratings to maintain platform quality standards.
